PROTECT WITH DENTEC

Many of our competitors have respirator products manufactured for them in other countries such as China, Mexico and India. Over the last few years, there has been several international events that have caused serious supply challenges in the United States for critical PPE such as respirators.

- US China tariff dispute caused sudden and significant price increases in respirator products due to the tariffs imposed on Chinese manufactured goods.
- New NAFTA trade negotiations between US, Mexico and Canada caused additional duties that were imposed on products manufactured in Mexico.
- In the past 17 years we have experienced one virus every 2.8 years including COVID-19.
- Each virus exposed us to the deficiencies in our supply chain for respiratory protection but none to the extent of COVID-19. They are predicting the arrival of new viruses will accelerate.
- China did not allow the export of NIOSH approved respirators to the United States at a time when we needed them most. There is great concern that China will take these measures again when another virus effects our lives. It's important to note the United States sent millions of respirators and other medical supplies to China when COVID-19 ravaged their country.

COVID-19 and the reaction of the Chinese Government must serve as a wake-up call, and we must do everything possible to support products manufactured in the United States. We have taken great measures and invested millions of dollars to ensure our ability to manufacture and supply our reusable respirators including half masks, cartridges and filters to North America. The unimaginable events we experienced and continue to endure are the very reason Dentec Safety has maintained and invested in our operation in Kansas!!

Our team members in Lenexa, Kansas have over 90 years of experience in manufacturing, designing and assembling respirators and faceshields. The incredible work and effort they have put forth during the COVID-19 virus to produce and assemble product is truly remarkable.

Here's what we have accomplished in a short few weeks:

- Hired more staff and will be hiring more again
- 24-hour molding for key components
- New automated manufacturing equipment to cut filters, fill cartridges, etc.
- Additional multi-cavity molds to produce more product faster
- And believe it or not we have several new respirator products in development that we will announce soon.

The infra-structure project and Buy American Act has been put into place to ensure that the US market supports the use of American made products for American projects.

To say these are challenging times is an understatement. And as the pandemic enters it's sixth wave, we are doing our part to ensure we protect American workers in every industry, and I ask you to please consider Dentec Safety for your respiratory and face protection requirements.

Be Safe!

Claudio Dente
President / CEO

PROTECT WITH DENTEC

SERIES 400NxMD ELASTOMERIC WHITE RESPIRATOR

Comfort-Air 400NxMD White Half Mask Elastomeric Rubber Respirator - A Reusable Mask Without An Exhalation Valve!

Two-way filtration...in and out Air-tight seal,
safer than disposables
More comfortable than disposables,
less expensive & reduces waste

P100 - Suitable For COVID virus in accordance with CDC guidelines and Non-Oil based aerosols

N95 suitable For COVID virus in accordance with CDC guidelines and Non-Oil based aerosols

Packaged 1 Respirator per/bag – 24 Respirators per/cs

400NxMD FACEPIECE ASSEMBLY	
400NXMD-SM-00	Small/Medium
400NXMD-ML-00	Medium/Large

400NxMD INCLUDES P100 CARTRIDGES	
4-SM-NXMD-LP0	P100, Small/Medium
4-ML-NXMD-LP0	P100, Medium/Large

SERIES 100 SILICONE RESPIRATOR

Half Facepiece Respirator

COMFORT-AIR PURIFYING Half-Mask respirator molded from pure silicone. Comfortable and easy to clean. Textured "no-slip" Face Seal & large, flexible sealing edge. Multi-Position cartridge attachment. Extra large inhalation valves & unique corrugated exhalation valve diaphragm.

Packaged 1 Respirator per/bx – 24 Respirators per/cs

100-S-00	Silicone Rubber Facepiece assembly, Small
100-M-00	Silicone Rubber Facepiece assembly, Medium
100-L-00	Silicone Rubber Facepiece assembly, Large

Half Facepiece Respirator Complete with Reuseable N95 or R95 Filter Assembly

N95 suitable for Lacquer & Enamel Paints, Pesticides, Welding, Dusts, Certain Non-Oil Mists

R95 suitable for Lacquer & Enamel Paints, Pesticides, Welding, Dusts, Certain Non-Oil & Oil Mists (for up to 8 hours)

Packaged 1 Respirator per/bx – 24 Respirators per/cs

1-S-DN5	N95, Small	1-S-DR5	R95, Small
1-M-DN5	N95, Medium	1-M-DR5	R95, Medium
1-L-DN5	N95, Large	1-L-DR5	R95, Large

Half Facepiece Respirator Complete with Diskit® P100 Filter Assembly

P100 suitable for Toxic Dusts, Mists and Fumes, Lead Dust and Fumes, Break Dust, Exotic Welding, Glass Fibers, Asbestos (Note: specific limitations apply for asbestos removal, see OSHA 1910.1001)

Packaged 1 Respirator per/display bag – 6 Respirators per/cs

1-S-DISKITP100ZAM	Diskit®P100, Small
1-M-DISKITP100ZAM	Diskit®P100, Medium
1-L-DISKITP100ZAM	Diskit®P100, Large

Half Facepiece Respirator Complete with Diskit® P100OV Filter Assembly

P100OV suitable for Oil & Non Oil Based Particulate Aerosols including; Silica Dust, Lead Dust and Fumes, Break Dust, Exotic Welding, Glass Fibers, Asbestos (Note: specific limitations apply for asbestos removal, see OSHA 1910.1001) and Nuisance Levels of Organic Vapors below the Permissible Exposure Levels (PEL)

COMFORT[®] AIR SERIES 300 THERMOPLASTIC RESPIRATOR

Half Facepiece Respirator

COMFORT-AIR PURIFYING Half-Mask respirator molded from thermoplastic rubber provides excellent comfort and durability. Only 9 replacement parts. Flexible sealing edge. Multi-Position cartridge attachment. Extra large inhalation valves & unique. Corrugated exhalation valve diaphragm moves more hot air out of the mask more easily.

Packaged 1 Respirator per/bx – 24 Respirators per/cs

300-SM-00	Thermoplastic Rubber Facepiece assembly, Small/Medium
300-ML-00	Thermoplastic Rubber Facepiece assembly, Medium/Large

Half Facepiece Respirator Complete with Reuseable N95 or R95 Filter Assembly Filter

N95 suitable for Lacquer & Enamel Paints, Pesticides, Welding, Dusts, Certain Non-Oil Mists

R95 suitable for Lacquer & Enamel Paints, Pesticides, Welding, Dusts, Certain Non-Oil & Oil Mists (for up to 8 hours)

Packaged 1 Respirator per/bx – 24 Respirators per/cs

14881	Retainer for Particulate Filters, Suitable for Paint 6/Pack
14881B350	Bulk Pack of Retainer for Paint 350/Box

Diskit FILTERS

DISKITP100, P100 particulate filter, minimum 99.97% efficient protection against oil & non-oil particulates.

DISKITP1000V, P100 particulate filter, minimum 99.97% efficient protection against oil & non-oil particulates. Filters nuisance levels of organic vapors and ozone below the permissible exposure levels (PEL).

- Lightweight - only 0.8 oz.
- Ultra-low profile
- Crush-proof internal frame
- Low breathing resistance
- Multi-position connector
- Extended filter life*
- Available welding spark shield

Rigid Internal Frame

Lightweight and ultra-low profile, the Diskit® revolutionizes comfort and compatibility.

Offset Filter Connector

Diskit® Cartridge Construction

DISKITP100	P100 Particulate Filter 10 Pair/Box
ISKITP100B50	P100 Particulate Filter 50 Pair/Box
DISKITP1000V	P1000V Particulate Filter 10 Pair/Box
DISKITP1000VB50	P1000V Particulate Filter 50 Pair/Box

Diskit ACCESSORIES

The **Diskit® adapter** allows you to convert any of the Comfort-Air cartridges into a P100 combination cartridge. Simple attach the adapter to any of the cartridges and attach the DiskitP100 to the adapter. Simple, easy and will reduce cartridge consumption costs by more than 50%.

14885 Diskit® SparkShield Cover 1/Pair

14890 Diskit® Cartridge Adapter 10 Pair/Box

The **Diskit® SparkShield Cover** protects the Diskit from hot metal chips, dirt and debris. Fits over the DiskitP100 and DiskitP1000V.

79100	Respirator Wipe, Alcohol Free, 10 Boxes/Case
79110	Respirator Wipe, 70% Isopropyl Alcohol, 10 Boxes/Case

ULTIMATE FACE PROTECTION

The FaceTec™ faceshield has been designed to provide the ultimate in total face and chin protection in a unique design:

- Molded from high-strength polycarbonate material, it is made to withstand rugged use and withstand impact
- Super light weight for all day use
- Unique double crown protects both the forehead, chin and neck areas
- Curved Chin design tucks under the chin preventing interference with the shoulders when turning the head from side to side and will provide a seal against the lower part of the neck in the working position. Protects against particles from entering the face and chin area
- Visor mounts into the frame and will withstand high impacts without allowing the visor to collapse to the face, eliminating impact
- Ratchet-style suspension allows the user to quickly and easily adjust the suspension to their head size.
- "Flip Down" adjustment knobs allow the user to adjust the friction to simply nod their head to flip the faceshield down into position
- Capmount style fits into most hard hat slots
- Capmount adapter may be adjusted to fit over various hard hat peaks (short or longer)
- Visor styles available
- PETG Clear
- Polycarbonate Clear and Green
